

## SUMMER COURSES IN THE USA

Mandoulides Schools, as part of the preparation we offer students for their success at universities abroad, recommend that students attend one of the summer courses at famous schools and universities in the USA.

During these courses students from the USA and all over the world attend classes according to their interests such as mathematics, physics, chemistry, biology-genetics, public health, information technology, economics, psychology, philosophy, history, archaeology, literature, creative writing, languages, debate, drama and music, they stay in university dormitories and participate in sports and social activities. In this way they are able to gain insight into the way of living and the demands of such courses at an American University, they get in touch with peers from all around the world and they broaden their horizons.

The cost of these summer courses depends on their length and students always have to cover the transfer cost. Participation in the program requires that the student have high grades in the subjects he/she is interested in attending, good knowledge of English, references from teachers, and essays.

Under no circumstances is it guaranteed that attendance of such a course will lead to the student's admission into a university abroad. However, a good performance will be positively evaluated by a university later on.

Applications should be completed and submitted either electronically or by post.

For further information you can contact Ms. F. Bathrellou.

The courses we recommend fall into two categories:

**A. Courses at Junior and Senior High Schools and B. Courses at Universities.**

### **A. Courses at Junior and Senior High Schools**

**Phillips Academy Andover**

**Summer@Andover**

**Andover, Massachusetts 01810-4161**

**Tel: 978-749-4400**
