

## When the game becomes creation!

At the beginning of this school year, a new multipurpose sports and entertainment area was launched on the premises of Mandoulides Elementary School. Just next to the zoo, pupils of all grades can demonstrate their skills in mini-golf and tennis or attempt to climb the wall. In the hope that the joy of play can be harmoniously combined with the development and cultivation of children's skills, Mandoulides Schools cater for the constructive use of pupils' leisure time during breaks. At the same time, the area can be used for sports during gym class, whenever teachers deem this necessary. What is more, a vegetable garden has been planted in an area nearby, where pupils will have the opportunity not only to monitor all stages of the plants' growth from seed to fruition, but also to participate actively in the process. In this way children leave the classroom and enjoy the practical side of learning in a pleasant environment.
